

Gavin Donkin
Honeywell Transportation Systems
Vice President of Product Development

Gavin has worked for Honeywell Transportation Systems (TS) for more than 24 years and has held various positions in engineering product development, application engineering, engineering design, prototype & test as well as product assurance. He has been involved in both the passenger car and commercial vehicle markets and has worked in the UK, North America, France and is currently based in Switzerland.

Gavin Donkin is vice president of product development and reports directly to Craig Balis, VP and CTO for Honeywell Transportation Systems.

Gavin's role focuses on broadening and accelerating the Honeywell TS innovation pipeline from flawless launch to post-production aftermarket growth. Gavin's previous motorsports and advanced concepts organizations, along with all engineering product lines, aftermarket engineering and product assurance are also aligned under the product development organization.

Gavin holds a degree in mechanical engineering & thermo fluids from Huddersfield University and a diploma in management from Preston University.
