

Honeywell Japan Inc.

Honeywell

THE POWER OF **CONNECTED**

Honeywell's innovative technologies are making our world **cleaner** and more **sustainable**, more **secure, connected, energy efficient**, and **productive**.

Greetings

Honeywell invents and manufactures technologies to address some of the world's toughest challenges around macro trends in science, technology, and society.

A Fortune 100 diversified technology and manufacturing leader, we serve customers worldwide with aerospace products and services; control technologies for buildings, homes, and industry; turbochargers; and performance materials.

As the digital revolution is changing the way we live and work with exciting new products that connect us and incorporate software and data in new ways, Honeywell is transforming into a leading cyber industrial company.

Our growth strategy focuses on blending superior software capabilities with our advanced physical technologies. Honeywell is the first large Western company to reach CMMI® Level 5 capability among all of its software engineers. This is a very high standard that uniquely qualifies Honeywell to compete effectively in the Internet of Things arena.

Honeywell's presence in Japan began more than 60 years ago. Over the years we have grown our business with the strong support and trust of our Japanese customers. Today, with more than 400 employees in Japan providing sales, marketing, manufacturing, and services to our customers, Honeywell Japan stands out from competitors with our wide range of products and solutions as well as our robust and secure IoT and big data capabilities for all of Honeywell's connected solutions. From mobility and automation to components and materials, we serve all the local market needs. Tokyo is preparing for the year 2020 and Japan is increasingly concerned about energy efficiency, connectivity and sustainability. This presents us with great opportunities to further introduce innovative and environmentally-responsible technologies and solutions for Japan.

We appreciate the long-term confidence and support from our Japanese customers. Honeywell's innovative technologies are making our world cleaner and more sustainable, more secure, connected, energy efficient, and productive. We are here to facilitate a better life and a better environment, while helping our customers succeed.

Yasuhiro Kinoshita
President, Honeywell Japan

Great Positions in Good Industries

Energy Efficiency and Clean Energy Generation

With nearly 50 percent of our portfolio dedicated to energy solutions, Honeywell is leading the charge in energy efficiency and clean energy generation.

Air Traffic Modernization

Biofuels

Green Buildings

Low-Global-Warming Refrigerants

Fuel-Efficient Turbochargers

Industrial Process Efficiency

Demand Response & Smart Grid

Energy Performance Contracts

Home Security

Industrial Process & Safety

Gas Monitoring & Detection

Honeywell Instant Alert®

Cybersecurity

Personal Protective Equipment

SmartView™ Synthetic Vision System

Spectra® Fiber

Safety and Security

Honeywell equipment and technologies can help keep an emergency from becoming a tragedy, and our security solutions protect us from emerging threats.

Expanding Global Wealth Per Capita

Honeywell is developing solutions that support growing infrastructure and improve the quality of life for people around the world.

Air Traffic Management

Refining Technologies

Airport Solutions

Indoor Air Quality

Smart Grid

Health and Safety

Turbochargers

Petrochemical Technologies

In-Flight Productivity

Industrial Scanning & Mobile Computers

Voice Controls

Retail Scanning

OneWireless™ Mobile Control Room

Cockpit Systems

Connected Warehouse

Wireless Sensors

Worker Productivity

Honeywell solutions help our customers be better, faster, and more efficient.

Our Businesses

At all businesses Honeywell integrates its software technology excellence. Honeywell is the first and only large Western company who is 100% compatible with CMMI® Maturity Level 5 across all global operations and in every business.

Honeywell's Four Strategic Business Groups

Aerospace

With comprehensive offerings ranging from **wheels and brakes** and **propulsion** to **cockpit systems** and **satellite communications**, our products are used on virtually every commercial and defense aircraft platform. We also design and manufacture **world-class turbochargers** that help enable vehicle performance and fuel efficiency.

- Cockpit systems
- Runway & flight safety technology
- Air traffic management
- SATCOM & connectivity
- Propulsion
- Precision guidance
- Wheels and brakes
- Logistics services
- Gasoline, diesel, hybrid, and fuel cell turbochargers with variable nozzle technology

Performance Materials and Technologies (PMT)

We develop **advanced materials**, **process technologies**, and **automation solutions** and **industrial software** that are revolutionizing industries around the world. Our products help lower global warming potential and reduce emissions while enabling our customers to produce cleaner fuels, improve operational efficiency, and increase throughput capacity.

- Oil & gas process technology, equipment, catalysts, and services
- Industrial automation controls
- Low-global-warming potential refrigerants
- Specialty films and additives
- Advanced fibers and composites
- Electronic materials and chemicals

Home and Building Technologies (HBT)

Our products, software and technologies are in more than 150 million homes and 10 million buildings worldwide helping customers control their comfort, security, and energy use, with technologies ranging from **environmental and building controls** to **security and fire alarm systems** and **smart grid solutions**.

- Home comfort and security
- Building control systems
- Smart grid/demand response technology
- Fire alarm systems
- Remote health monitoring

Safety and Productivity Solutions (SPS)

We provide **scanning and mobile computers**, **warehouse automation**, and **printing and media solutions** that improve enterprise and workflow performance, increase worker productivity, and enrich operational intelligence with data-driven insights. We also provide **personal protective equipment** to enhance workplace safety.

- Automatic identification and data collection
- Warehouse automation
- Personal protective equipment
- Gas detection
- Printing and media
- Scanning and mobile computers

Honeywell At A Glance

Global Headquarters: Morris Plains, NJ, U.S.

President & CEO: Darius Adamczyk

Operation: ~1,300 Sites in ~70 countries
50% Americas, 25% EMEA, 9% China,
11% India, 5% Other Asia Pacific

Employees: ~131,000 incl. 23,000 engineers worldwide
(nearly 50% engineers focused on software)

NYSE - Honeywell International Inc. (HON)

Fortune 100 (US Top 100 Revenue) Company

2016 Results:

Sales Total \$39.3B

54% Sales outside the U.S.

46% U.S., 8% Other Americas, 25% Europe,
5% China, 2% India, 4% Middle East,
10% Others

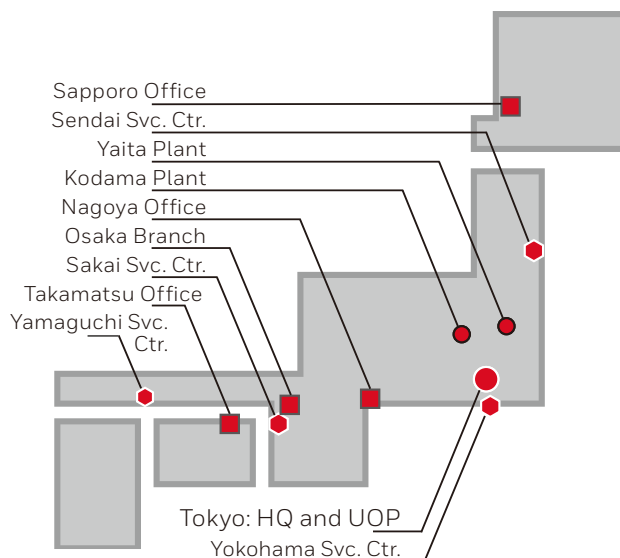

Sales by SBG:

AEROSPACE \$14.8B	HBT \$10.7B
PMT \$9.3B	SPS \$4.6B

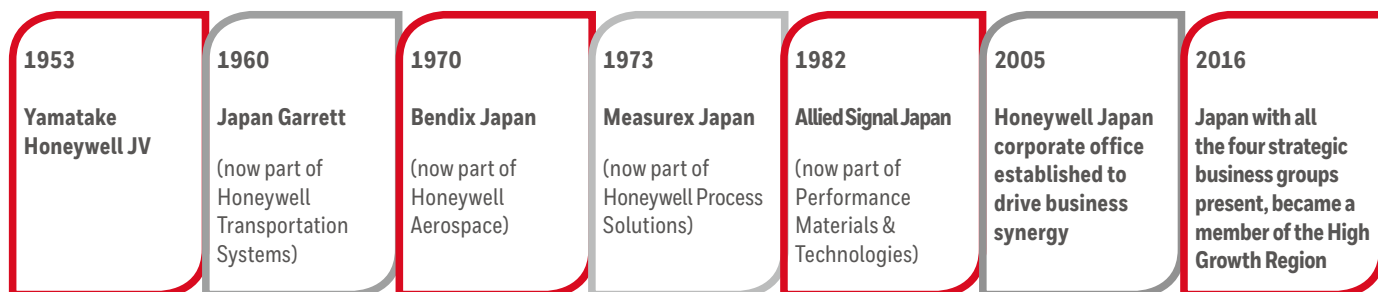

Honeywell Japan

60+ Years in Japan

Honeywell's history in Japan can be traced back to the early 1900s when some instrumentation products were traded in Japan through Yamatake Shokai Co., Ltd. (now Azbil Trading Co. Ltd.). In 1953, a joint venture between Honeywell and Yamatake Keiki Co., Ltd. (now Azbil Corporation) was established to help accelerate industrial automation. As Japan continued to industrialize, Honeywell grew along with its Japanese customers, in both business size and product portfolio. Six decades later, all of Honeywell's strategic business groups are conducting business in Japan through their local offices with wide range of products from turbochargers, avionics, refineries and petrochemical plants, from electronic components, scanners and sensors, to pharmaceutical packaging films and ultra-low-GWP refrigerants and insulation foam-blowing materials. Nowadays, the company's growth strategy focuses on software capabilities, which represent a large portion of our growth over the next several years. In Japan, Honeywell Automotive Software offers innovative solutions for Powertrain Control, Virtual Sensing, Cyber Security and Integrated Vehicle Health Management allowing OEMs to sell safer vehicles with better fuel economy. Honeywell's products and solutions are applied across multiple industries and have become an integral part of Japanese economy and society. Honeywell is committed to continuing to serve its Japanese customers with technological solutions tailor-made for their needs.

Corporate Citizenship

Hometown Solutions

Honeywell Hometown Solutions is the Company's corporate citizenship initiative, which focuses on five areas of vital importance: Science & Math Education, Family Safety & Security, Housing & Shelter, Habitat & Conservation, and Humanitarian Relief.

Guidelines and Policies

Honeywell observes the highest standards of business ethics and corporate social responsibility wherever we operate.

Sustainable Opportunity

Our solutions and technologies expand sustainable capacity and improve the efficiency of products and processes, fostering "Sustainable Opportunity."

Diversity

Diversity is the foundation of a performance culture that promotes respect, understanding, and appreciation of different perspectives, backgrounds, and experiences.

Sustainable Opportunity

Honeywell is making our businesses more environmentally friendly, safer, and more sustainable. By 2019, we will reduce our global greenhouse gas emissions by an additional 10 percent per dollar of revenue from our 2013 levels. We exceeded our first public goal to reduce global greenhouse gases by more than 30 percent and improve energy efficiency by more than 20 percent between 2004 and 2011. A second five-year goal, set to reduce greenhouse gas emissions by an additional 15 percent per dollar of revenue from 2011 levels, was met three years early.

**>65% Reduction
in our GHG
emissions
2004-2016**

**~40% Increase
in our energy
efficiency
2004-2016**

For our community - Honeywell Hometown Solutions

Just as we're committed to creating tools and solutions to improve people's quality of life, Honeywell is committed to making a measurable difference in our own

neighborhoods and communities. Honeywell's CSR activities in Japan include responsive relieves in the aftermath of 2011 earthquake and tsunami such as provision of personal protective equipment and unmanned micro air vehicle. Among all the community services, Honeywell is proud to have helped building the Honeywell Ibasho House in Massaki-Cho, Ofunato City, Iwate Prefecture. Opened in June 2013, it is dedicated to enriching the lives of elderly people affected by the Great East Japan Earthquake and Tsunami of 2011. Ibasho House is run by volunteers from the local community and has become a place that welcomes, gathers, and ties people in the rebuilt neighborhood.

Honeywell Ibasho House,
Ofunato, Iwate

Honeywell Japan employees visited the Ibasho House to attend the Learning "Kamado" event in October 2014.
