

Honeywell in Thailand

Honeywell is a Fortune 100 diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell's shares are traded on the New York, London and Chicago Stock Exchanges.

For over two decades, Honeywell has grown along with Thailand's industry, enhancing its infrastructure network and supporting its sustainable economic development. The company provides high-quality automation and control solutions, performance material technologies and aerospace products and systems to local customers. Today, Honeywell has three subsidiaries in Thailand: Honeywell Systems (Thailand) based in Bangkok and Rayong, Honeywell Electronic Material (Thailand) base in Chonburi and Honeywell Holdings Thailand.

Honeywell's corporate social responsibility initiative, Honeywell Hometown Solutions, is an award-winning organization that focuses on five areas of vital importance to communities around the world: Science & Math Education, Family Safety & Security, Housing & Shelter, Habitat & Conservation, and Humanitarian Relief. Together with leading public and non-profit institutions, Honeywell has developed powerful programs to address these needs in the communities it serves.

Performance Materials and Technologies

- Honeywell Performance Materials and Technologies (PMT) is a global leader in developing advanced materials, process technologies and automation solutions. PMT's Advanced Materials businesses manufacture a wide variety of high-performance products, including environmentally friendlier refrigerants and materials used to manufacture end products such as bullet-resistant armor, nylon, computer chips and pharmaceutical packaging. Process technologies developed by PMT's UOP business form the foundation for most of the world's refiners, efficiently producing gasoline, diesel, jet fuel, petrochemicals and renewable fuels. PMT's Process Solutions business is a pioneer in automation control, instrumentation and services for the oil and gas, refining, pulp and paper, industrial power generation, chemicals and petrochemicals, biofuels, life sciences, and metals, minerals and mining industries.
- UOP is the leading supplier of process technology and related products, equipment, and services to oil refining and aromatics businesses of PTT, the national oil company of Thailand. UOP's Separex technology for CO₂ removal is installed in PTT's offshore gas fields on Bonkot and Arthit platforms.
- Honeywell Electronic Materials (Thailand) Co., Ltd. was initially formed in 1989. The Honeywell Electronic Materials factory manufactures cost-effective, high-quality integrated packaging solutions (IPS) for the world's leading semiconductor manufacturers.
- Honeywell PMT also provides caprolactum and nylon resin to a wide range of industry applications including fishnet, cable tie and textiles, as well as refrigerants for mobile and stationary air conditioning.

Aerospace

- Honeywell Aerospace products and services are found on virtually every commercial, defense and space aircraft, and its turbochargers are used by nearly every automaker and truck manufacturer around the world. The Aerospace business unit develops innovative solutions for more fuel efficient automobiles and airplanes, more direct and on-time flights, safer flying and runway traffic, along with aircraft engines, cockpit and cabin electronics, wireless connectivity services, logistics and more. The business delivers safer, faster, and more efficient and comfortable transportation-related experiences worldwide.

- For automobile transport, Honeywell Transportation Systems (TS) is an industry leader developing technologies and innovations in turbocharging as well as braking materials. Honeywell Turbo Technologies is a leading automotive turbocharger supplier providing technology solutions to nearly every major automaker and truck manufacturer in the world. Honeywell turbo launches an average of 100 turbo applications a year and has nearly 500 in its development pipeline enabling fuel-saving and emission-reducing downsized turbocharged engines for passenger vehicles (gasoline, diesel, CNG, and hybrid), medium- and heavy-duty trucks, and off-highway, heavy-duty equipment. Honeywell supplies to original equipment manufacturers as well as the global automotive aftermarket.
- In Thailand, TS supplies Nissan with turbochargers for its light pick-up trucks and additionally sells its range of turbochargers through a specialized master distributor to the aftermarket to serve the needs for installers to service and replace turbo chargers with original products. Honeywell also has a JV with Bosch in which Disc Brake Pads for Automotive applications are produced primarily for sales into the service and replacement Aftermarket through its channel partners.

Automation and Control Solutions

- Honeywell Automation and Control Solutions (ACS) offer a complete portfolio of innovative products, solutions and systems to create safer, more comfortable, more secure, more productive and more energy efficient environments at home and at work. ACS' seven businesses sell, manufacture and deliver products and services to consumers, businesses and industries in every region of the world. They include Environmental and Combustion Controls (ECC), Honeywell Building Solutions (HBS), Honeywell Fire Safety (HFS), Honeywell Industrial Safety (HIS), Honeywell Security Group (HSG), Honeywell Scanning & Mobility (HSM) and Sensing and Control (S&C). Its products, services and solutions help protect, control and automate 150 million homes, 10 million buildings, thousands of manufacturing and industrial plants, and 24 of the top 25 oil refineries in the world.
- Since 1987, Honeywell Systems (Thailand) has been providing local customers with automation and control systems and products for industrial complexes and building solutions. Building management system, control system, security and fire alarm systems, and field instruments are our major products for the Thai market.
- Honeywell switches and sensors are mainly applied to five major industries in Thailand, including medical, industrial, transportation, aerospace & defense, as well as test & measurement, with a focus on the contract manufacturing industry.

Honeywell Hometown Solutions

- Honeywell conducted a unique activity called the "7% Helmet Project" in Phuket, Thailand in 2014, as a part of the national "Save the Children" project by the Asian Injury Prevention Foundation. During the activity, each Honeywell employee was paired with a child to creatively paint a helmet to spread the message that wearing helmets is essential for child safety and it can be cool at the same time. The decorated helmets were donated to those children who promised to use them regularly.
