HONEYWELL MAKES SCIENCE FUN FOR 320 HIGH SCHOOL STUDENTS AT THE HONEYWELL LEADERSHIP CHALLENGE ACADEMY

*Unique scholarship program promotes STEM education and effective leadership skills
at the U.S. Space & Rocket Center*

SINGAPORE, February 22 – [Honeywell](#) (NYSE: HON) announced that 320 students from 36 countries, including one from Singapore, will attend the Honeywell Leadership Challenge Academy (HLCA) this year. The unique leadership program offers two consecutive week-long programs from February 20 to March 4, 2016, at the U.S. Space & Rocket Center (USSRC) in Huntsville, Ala.

HLCA uses interactive technology, science-oriented workshops and team exercises to teach children of Honeywell employees between the ages of 16-18 leadership skills in science, technology, engineering and math (STEM). The program is designed to build students' leadership skills and develop their capabilities through hands-on challenges.

During the program, students will meet scientists, engineers and former astronauts who will reinforce core leadership competencies and share their professional experiences. Students will engage in team-building challenges such as designing, building and testing rockets and participating in simulated astronaut training, shuttle missions and a moon walk.

“Honeywell and its employees have a long history of promoting unique math and science education programs around the world,” said Dr. Deborah Barnhart, CEO and executive director, USSRC. “With HLCA, we help students develop confidence in their leadership skills and envisage a successful path for their future.”

“Many of the world’s most exciting and in-demand careers are based in STEM,” said Michael A. Bennett, president, Honeywell Hometown Solutions, the company’s global corporate citizenship initiative and sponsor of HLCA. “Honeywell’s goal is to inspire today’s students to become the next generation of engineers and scientists who will solve tough problems and improve quality of life.”

Briand Greer, the newly appointed president for Honeywell Southeast Asia, added: “Previous participants came home from this exciting experience with a broader perspective and greater understanding and appreciation for the opportunities that STEM-oriented professions offers them. We hope and expect that they will become significant contributors to their country’s development, and we encourage even more students from the region to join and benefit from this special program.”

Since its launch in 2010, Honeywell, in partnership with the USSRC, has awarded 1,770 scholarships to students, including seven from Singapore. Scholarships are granted after a rigorous application and review process based on academic achievement and community involvement. Financial contributions from Honeywell and its employees fund the scholarships, which cover the cost of tuition, meals, accommodations and program materials.
