TEACHERS INVITED TO JOIN ASTRONAUT TRAINING & DEVELOPMENT OPPORTUNITY***Honeywell Scholarship Program Delivers Effective Teaching Techniques Designed to Encourage Students' Interest in Science and Math***

HANOI, November 26, 2012 – Teachers of mathematics and science around the world, including Vietnam, are now invited to apply for a simulated astronaut training and professional development program of Honeywell (**NYSE: HON**) at the U.S. Space & Rocket Center in Huntsville, Alabama. This will be the first time for teachers in Vietnam to explore an opportunity to embark on a learning adventure of a lifetime during the [*Honeywell Educators @ Space Academy*](#) program in June 2013.

Honeywell Educators @ Space Academy, created in partnership with the U.S. Space & Rocket Center in 2004, is designed to address the trends in science, technology, engineering, and math (STEM) education by providing teachers with new technical skills and teaching techniques that help motivate students around the world.

“Inspiring students begins with inspiring teachers,” said Tom Buckmaster, President of Honeywell Hometown Solutions. “As a leading technology company, Honeywell is committed to promoting science and math education and encouraging the next generation of technologists and engineers. *Honeywell Educators @ Space Academy* helps teachers move beyond the standard math and science curriculum and approach their lessons in new and innovative ways.”

Qualified applicants from Vietnam must be secondary school teachers of math, physics, chemistry, geography or information technology who can understand English.

Each successful applicant from Vietnam will receive a full scholarship following a rigorous and lengthy application and selection process involving competing teachers from around the world. Scholarships include tuition for the five-day program, roundtrip airfare, meals, accommodations, program materials, and flight suits, all sponsored by Honeywell and contributions from Honeywell employees.

Honeywell Educators will participate in 45 hours of professional development, as well as an intensive educator curriculum focused on space science and exploration. Activities include classroom, laboratory, and field training exercises linked to international science and math teaching standards. Each teacher will also undergo simulated astronaut training including:

- A high-performance jet simulation
- Scenario-based space mission
- Land and water survival training
- Interactive flight dynamics programs

“During my time in Huntsville, I met other like-minded teachers who genuinely care about their students and the responsibility of the teaching profession. My time spent at the Academy really reinvigorated my interest in NASA and space exploration/education and gave me a wealth of lesson plans, classroom activities, and teambuilding ideas that I can immediately incorporate into my 8th grade science classroom this fall,” said Joshua Kohn from Minnesota, USA, who was selected to join the program in 2012.

Since the program’s inception, Honeywell and its employees have sponsored more than 1,700 teachers from 44 countries and all 50 U.S. states to participate in the *Honeywell Educators @ Space Academy* program.

“Honeywell is making a substantial STEM contribution by targeting teachers,” said Dr. Deborah Barnhart, Chief Executive Officer of the U.S. Space & Rocket Center and former VP of Space Exploration for Honeywell. “Recent Congressional testimony noted that educating teachers in technology is the most effective way to increase student interest in STEM. As in all of their business endeavors, Honeywell is leading the way in STEM as well!”

The application deadline for the 2013 Honeywell Educators @ Space Academy is **Friday, December 14, 2012**. Applicants will be assigned one of the two sessions: June 14 – 20, 2013 or June 21 – 27, 2013.

About Honeywell International

Honeywell International (www.honeywell.com) is a Fortune 100 diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell’s shares are traded on the New York, London, and Chicago Stock Exchanges. For more news and information on Honeywell, please visit www.honeywellnow.com.

About Honeywell Vietnam

Honeywell officially set up its Vietnam operations in 2005 with offices in Hanoi and Ho Chi Minh cities. Honeywell has been providing Vietnam market with technologies including avionics, auxiliary power units (APU), CCTV and surveillance products, process solutions, oil refining technologies, building automation solutions, and specialty materials like resins and chemicals. In 2011, Honeywell achieved US\$43 million sales revenue in Vietnam.

About Honeywell Hometown Solutions

Honeywell Educators @ Space Academy is part of Honeywell Hometown Solutions, the company’s corporate citizenship initiative, which focuses on five areas of vital importance: Science & Math Education, Family Safety & Security, Housing & Shelter, Habitat & Conservation, and Humanitarian Relief. Together with leading public and non-profit institutions, Honeywell has developed powerful programs to address these needs in the communities it serves.
