

HONEYWELL TO IMPROVE OPERATIONAL PERFORMANCE AT VIETNAMESE FERTILIZER PRODUCTION FACILITY

State-Owned Ha Bac Plant to Boost Safety and Productivity With Honeywell Solutions

HANOI, April, 2013 – Honeywell (NYSE: HON) today announced that Ha Bac Nitrogenous Fertilizer and Chemicals Joint Stock Company, a leading state-owned Vietnamese producer of urea and nitrogenous fertilizer for domestic consumers, has selected [Experion® Process Knowledge System \(PKS\)](#), [C300 Controller](#) and [Safety Manager](#) to improve safety, reliability and efficiency at its flagship nitrogenous fertilizer plant in Bac Giang City, Vietnam.

Ha Bac will use Honeywell's Experion® PKS platform and C300 controller to deliver more stable and efficient process control at the site, helping to increase the utilization of raw materials, reduce energy consumption and provide a greater level of integration between the systems responsible for synthetic ammonia and urea. The new solution will also help to reduce greenhouse gas emissions and increase production capacity at the Bac Giang site.

Furthermore, Honeywell's Safety Manager will be deployed to improve system reliability and increase process uptime, leading to a safe production environment and operational savings.

“As one of the leading fertilizer production facilities in Vietnam, it is crucial that Ha Bac is able to operate as safely and efficiently as possible around the clock,” said Mai Trang Thanh, president of Honeywell IndoChina. “Honeywell's automation solutions will help Ha Bac to achieve its goals of optimizing plant production and reducing downtime, increasing the plant's levels of automation and control in a cost-effective manner.”
