This document is intended to help customers to select medical SPO2 sensors and adapters out of the Honeywell Healthcare Solutions GmbH portfolio that are compatible to the original sensors.

While Honeywell may provide information or engineering support for its products through Honeywell personnel, literature and website, it is the customer's sole responsibility to determine the suitability of the Honeywell product(s) for the customer's requirements. Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing.

Check the Honeywell website for the latest version of this document and for technical details of the sensor specifications!
